

## PROCESS FOR SAREC RESEARCH PROPOSALS

### What a Researcher Should Do

1. Concept: Answer whether the proposal idea is compatible with the mission of SAREC by reviewing whether the proposal addresses ***innovative discovery, dissemination, and engagement of integrated agricultural systems that are ecologically sound, economically viable, and socially acceptable*** as noted in the SAREC mission document.
2. Determine with SAREC station staff whether there are facilities and space that are or will be available in the appropriate temporal space.
3. Review the compatibility of the proposal with the SAREC advisory committee research approval process:  
[http://uwadmnweb.uwyo.edu/uwexpstn/SAREC/SAREC\\_ProjectProposalOutline\\_FINAL.pdf](http://uwadmnweb.uwyo.edu/uwexpstn/SAREC/SAREC_ProjectProposalOutline_FINAL.pdf)  
and submit the proposal to the committee.
4. Send proposal to funding agency.
5. On approval of proposal with funding agency, coordinate the space request and staff needs with the AES.
6. Annual review of project progress and review of space/staff needs.
